

*2019 is the Year to ReDiscover Diving*

# DIVE WORKSHOPS

*This is just one example of some of the programs  
being offered across the United States*

## *Spring, 2019*

**COURSE:** A non-certification workshop, open to all certified scuba divers of all skill levels. The goal is to help get some of the “rusty” divers safely back into the water, while teaching everybody about dive safety, accident prevention and rescue. Students may do as much or as little as they wish. Divers must provide their own diving equipment, pool wetsuit, octopus regulator or secondary air source, one full tank with a protective boot, a weight belt with soft or coated weights or removable

pockets. Students with medical conditions (respiratory issues, high blood pressure, etc) must provide a medical doctor's letter of clearance prior to using scuba. Additional Continuing Education Classes such as Nitrox, Advanced and Master Scuba Diver and Diving Leadership Courses are also available.

#### **LECTURE**

- Diving Safety Review & Accident Prevention
- Medical Aspects of Diving
- Neurological Assessments of Divers
- Introduction to Oxygen Administration & Nitrox
- Boat Diving Techniques
- Dive Rescue

#### **POOL**

- Diving Equipment Review and Gear Updates
- Diving Skills Review and Techniques
- Diver Assists and Tows
- Emergency Ascent Review
- Uncooperative or Panicked Diver on the Surface
- Unconscious Diver on the Surface and the Bottom
